12 1/8" (308mm) x x116" (2947mm)

Custom Panel Sizes available.

The Proclad Aline Series is a true pressure equalized rain screen system. The vented air space behind the panel face keeps the cavity dry resulting in long term performance.

The Aline series panel systems are manufactured using light gauge steel with a high-performance finish that is applied in a continuous coil to coil process. Proclad manufactures a flat panel but in certain lighting conditions with high glare the panel can show any imperfection in the substrate to which the panel is applied. Less than perfect surfaces are not a reason for rejection.
