

Bright colored fascia can be striking!

Finish the roof edge with style.

There are several options available to make sure your building has a clean cut to the sky.

- Flat surfaces.
- Clean lines top, bottom and between.
- No laps, just crisp, clean lines making the transition from roof to sky.

Architectural Fascia and removable roof side flashings.

About Us

Roof edges can often be seen as a performance flashing as opposed to an architectural feature. Design options for this area of the building are available and endless.

Fascia Options by Proclad

Proclad Enterprises Ltd.
38 Rayborn Crescent
St. Albert, Alberta T8N 4B1

Architectural fascia using light gauge reinforced materials.

Light gauge steel and aluminium is readily available for local supply sources in a variety of colours. Proclad fascia systems are reinforced in several different ways to ensure an attractive architectural finish.

Crisp clean lines at your roof edge and fascia will dramatically change the look of your building!

Modular Panel Designs

- **A variety of panel profiles and colours are available.**

Architectural facades using a variety of panel designs can make your building look special. Your customers will feel good to enter a business with an attractive look. Your staff will be proud to say, "This is where I work!"

Facades can take shape!

A variety of custom profiles are always available from Proclad. Our panels are formed from flat sheet. If you need profile or not, we can provide.

Horizontal profiles stretch your building.
Vertical profiles make you building look taller.

Horizontal profiles at roof edges provide a shaded look.

Function and form in one panel. Formed shapes and seamless reveals.

Our Products and Services

Proclad is a very capable sheet metal shop that has been fabricating a variety of shapes for the last 47 years. Our founders added another 25 years of experience prior to that. Experience is essential to bring new designs into reality.

Proclad has completed over 1500 buildings in North America and has fabricated over half a million metal panels for these projects.

Experience and solid supply sources will bring your project to life.
